

We are looking for ...

Software Function Responsible

The task of the SW function responsible consists of planning and controlling the implementation of a partial function of the software system. This includes the preparation and consolidation of requirements, preparation of the specifications and coordination of software developers and testers. Furthermore, he/she ensures the quality of the implementation of his/her function by carrying out tests in the integrated system and subjecting the created code and the documents to reviews. He/she is the first point of contact for questions concerning his/her function.

Your profile:

- Degree in the field of electrical engineering, computer science or comparable qualifications
- Good knowledge of German and English
- Excellent communication skills
- Results- and customer-oriented approach
- Analytical thinking and capacity for abstraction
- Planning and organizational capability
- Willingness to learn

Other useful knowledge:

- General experience with embedded systems
- Good knowledge of the programming languages C and C++
- Handling of common development tools
- Safe use of UML
- Programming of Microcontroller
