

We are looking for ...

## Software Project Manager (m/f)

The task of the SW project manager is to lead and control the project team. He/she is responsible for the software project and represents it to the customer and senior management. So, he/she creates the project plan and coordinates it with the customer. The SW project manager considers dependencies to other development areas, agrees with the customer on the functionality of the software and clarifies open points. Furthermore, he/she plans to use resources, defines responsibilities, and oversees project progress and project plan and budget compliance.

### Your profile:

- Degree in the field of electrical engineering, computer science or comparable qualifications
- Good knowledge of German and English
- Excellent communication skills
- Results- and customer-oriented approach
- Analytical thinking and capacity for abstraction
- Planning and organizational capability
- Willingness to learn

### Other useful knowledge:

- General experience with embedded systems
- Good knowledge of project planning tools such as MS Project
- Handling of ticket systems (Redmine, etc.)

### Have we aroused your interest?

Then we look forward to your relevant application documents, along with the cover letter including your availability at [jobs@schleissheimer.de](mailto:jobs@schleissheimer.de). If you have any questions, please feel free to contact us per mail to [jobs@schleissheimer.de](mailto:jobs@schleissheimer.de) or call us:

Antje Illing: +49 (0) 60349148-701

Doreen Kutt: +49 (0) 60349148-727

### Your tasks include:

- Planning the project
- Management of the project team
- Responsibility for the overall project
- Customer contact
- Coordination with higher management levels

### Here's what we offer you:

- Exciting tasks in an international and emerging company
- An extensive induction and training program
- Flexible working hours
- An attractive remuneration, incl. 13th month salary
- The opportunity for continuous education and training
