

We are looking for ...

Software Quality Engineer (m/f)

The task of the SW quality engineer is to advise and support the project team in complying with the quality guidelines. Together with the SW project manager, he/she defines the necessary processes and monitors their application.

Your profile:

- Degree in the field of electrical engineering, computer science or comparable qualifications
- Good knowledge of German and English
- Excellent communication skills
- Results- and customer-oriented approach
- Analytical thinking and capacity for abstraction
- Planning and organizational capability
- Willingness to learn

Other useful knowledge:

- General experience with embedded systems
- Handling common development tools
- Experience in software development processes
- Knowledge of existing guidelines (e.g. ISO or Automotive SPICE)

Have we aroused your interest?

Then we look forward to your relevant application documents, along with the cover letter including your availability at jobs@schleissheimer.de. If you have any questions, please feel free to contact us per mail to jobs@schleissheimer.de or call us:

Antje Illing: +49 (0) 60349148-701

Doreen Kutt: +49 (0) 60349148-727

Your tasks include:

- Conception and definition of quality guidelines
- Monitoring compliance
- Coordination with the project manager

Here's what we offer you:

- Exciting tasks in an international and emerging company
- An extensive induction and training program
- Flexible working hours
- An attractive remuneration, incl. 13th month salary
- The opportunity for continuous education and training
