

We are looking for ...

Software Test Manager (m/f)

The task of the SW test manager is the planning and coordination of all test activities. He/she evaluates the effort and plans the required resources. Furthermore, he/she defines the test environment, tools and methods needed. The SW test manager is the head of the SW test team and oversees the execution of the SW tests. He/she will generate test status reports and make them available to the project team.

Your profile:

- Degree in the field of electrical engineering, computer science or comparable qualifications
- Good knowledge of German and English
- Excellent communication skills
- Results- and customer-oriented approach
- Analytical thinking and capacity for abstraction
- Planning and organizational capability
- Willingness to learn

Other useful knowledge:

- General experience with embedded systems
- Handling of common development tools
- Safe use of UML

Have we aroused your interest?

Then we look forward to your relevant application documents, along with the cover letter including your availability at jobs@schleissheimer.de. If you have any questions, please feel free to contact us per mail to jobs@schleissheimer.de or call us:
